

Çimstone has received NSF International Certification from National Sanitation Foundation confirming that Çimstone surfaces used as kitchen countertops comply with NSF 51 standards as safe material.

Çimstone has a hygiene report accredited by Europe's most prestigious Product Analysis and Safety Centre LGA GmbH. It has been attested to be an easily cleanable and thoroughly safe surfacing material as to post cleaning microbiological hygiene.

EN

To assure the highest quality products, Çimstone applies European Standards for its production and quality control methods. Slabs are being produced according to "TS-EN 15388 Agglomerated Stone - Slabs and Cut-to-Size Products For Vanity and Kitchen Tops" standards. Tiles are being produced according to "TS-EN 15285 Agglomerated Stone – Modular Tiles for Flooring and Stairs" standards. We are proud to offer highest quality products all the time.

We stand behind our products 100%:

Çimstone provides absolute customer satisfaction by backing its products with a 100% corporate assurance throughout sales and after sales processes. Both the slab label affixed to one side of the slab and ÇİMSTONE brand name together with the production order number printed on the back of the slab contain important information pertaining to factory production which can be useful through the transportation, distribution, fabrication, installation, and troubleshooting processes. Slab info should be recorded for future reference.

Continuous beauty with a meticulous care...

Çimstone can tolerate brief exposures to moderately high temperatures. Still, all surfacing materials, including stone, can be damaged by extreme temperature changes, whether prolonged or sudden. When exposed to high temperatures, surfaces can react in various ways (cracking, discoloration, porosity etc.) depending on the product properties. Trivets and hot pads should be used when placing hot skillets, pans, crock-pots or other heat generating kitchenware on the surface.

ÇİMSTONE

Easy to care for and maintains its natural luster as on the first day...

**care
and
maintenance**

By following these guidelines, you may enjoy the natural beauty and splendor of Çimstone for many years to come.

JANUARY 2013

Like all fine materials, Çimstone responds best when handled with due care and attention. Remember, it is always easier to wipe up a spill than it is to handle a dried-on stain. Just wipe away any spilled food before it turns into a permanent stain.

Remember that detergents containing bleach and hard scouring granules may harm surfaces over time. Therefore, pay due attention in your detergent selection by never using cleaning products that contain soft or hard scouring granules such as Vim Scouring Powder or Cif Cream. Instead choose a liquid or gel cleaning agent (general cleaning products sold on the market) with either a neutral or almost neutral pH balance and always use water to thoroughly cleanse the surfaces off any detergent residue after treatment.

Gently scrape away with a plastic spatula any spills of paint, nail enamel, chewing gum, mustard and grease that become hard to remove when dried. Then cleanse the surface with water.

Quartz, being one of the hardest minerals on earth, offers Çimstone an unparalleled strength and durability that prevent easy scratching and damage. Still, as with any surface, Çimstone can be permanently damaged by exposure to strong forces that undermine its physical properties. In order for your countertop to maintain its good looks for many years, always use a bread/chopping board and a tablemat (trivet).

Daily Cleaning

Means for Cleaning:	A damp cotton cloth, ScotchBrite (3M) Soft Scour Sponge
Materials for Cleaning:	Pure water, liquid or spray detergents, non-abrasive liquid household cleanser
Method for Cleaning:	Clean the surface with a damp cloth and a little liquid/gel detergent, cleanse the surface off any detergent residues with water after treatment.

Examples of some proper cleaning agents for specific types of stains:

Removal of dried-on spills	Stubborn stains	Stains like rust or lime	Residues of grease
Cif Power Spray by Unilever	Concentrated Domestos Thick Bleach* by Unilever	Marc Deo Lime and Rust Removing Gel by Reckitt Benckiser	Ajax Spray & Wipe by Colgate Palmolive
Mr. Muscle Kitchen Spray by Johnson Wax	Mr. Proper Active Gel* by Procter & Gamble	Cillit Bang Anti-Kalk by Reckitt Benckiser	Mr. Muscle Kitchen Spray by Johnson Wax
Scrub with a blue Scotch-Brite (3M) Soft Scour Sponge and cleanse thoroughly with water.	Apply directly on the stain and then thoroughly rinse with water after treatment.	Apply directly on the stain and then thoroughly rinse with water after treatment.	Apply directly on the stain and then thoroughly rinse with water after treatment.

Caution:

- * Never leave your countertop to dry without thoroughly rinsing away any residual cleaning agent.
- * Definitely avoid using cleaners containing bleach that may permanently harm Çimstone with effect materials such as 422 Riviera with seashells.

Simple cleaning for a Sustainable hygiene...

Avoid using below list of chemicals on Çimstone :

- Alkali products containing active hidroxide (such as drain openers)
- Chlorinated solvents such as trichloroethylene or methylene chloride (like paint thinner or strippers)

In case of any accidental exposure to any of these damaging products, wipe up material immediately and rinse the surface thoroughly with plenty of clean water. Repeat if necessary.

Every production reflects the characteristics of the quartz used. This may cause partial shade and texture alterations in the finished products.
